ABSTRACT

Does crypto interest you but you are not sure whether to go it? We at CryptoLico provide you cryptocurrency investors with a platform to maximize your investments in digital currencies by offering an extensive interface that will provide services and automation leveraging AI technology and machine learning systems. CryptoLico will revolutionize the experience for all investors.

Cryptocurrency market is an ever evolving one therefore the systems and tools investors need to grow their investments must resonate with it. CryptoLico will help advance the services offered to investors in all aspects of digital market. Developers, teams, investors, and end users will all have a place within the CL platform. The platform will be enabled with the USDCoin; a secure and stable cryptocurrency that will be the implemented token for the platform.

CL will make your crypto investment experience simple and efficient by allowing you to get your returns on investments determined from the inception. This beats the structure used by investors who have more than \$10,000 sitting in the bank and earning less than half a percent. CryptoLico gives an all new look to investment, not only leveraging on Blockchain technology, but leveraging on AI and machine learning as well as using a stable Crypto, Stable USDCoin.

INTRODUCTION

CryptoLico Investment works by investors depositing their "Stable USDCoin" capital with us, in return, we invest by using our specifically designed AI and machine learning systems architected to efficiently run all uptrend trades in the crypto and forex markets, and simultaneously process the buying and selling of digital assets in derivative forms in order to take advantage of different prices and volatility to invest and trade best cryptocurrencies. Once we receive your deposit in your portfolio, we exchange your stable USDCoin for other crypto assets such as bitcoin, Litecoin, Ethereum and forex for only three(3)hours daily which our AI and Machine Learning systems immediately commence efficient and consistent trading with the funds, which increases the chances of placing all uptrend trades up to 98%. 0.11% interest is guaranteed on the first trading, and considering the volume invested in your wallet, this will make it easier to quickly make high returns on subsequent trading activities in order to accumulate profit. Trading automatically stops after the pre-set three (3) hours stop trade and we exchange the principal back from the market to your stable USDCoin portfolio. AI & machine learning continues trading on a daily basis, maximizing all uptrend opportunities.

As more and more people are getting into the industry, the value of individual coins and tokens is rising due to the demand. The cryptocurrency industry is in its early stages, which means investing now is the best time for high returns and earning the early investors a reasonable profit. One of the main ways to increase your USDCoin holdings is through trading, which is something that requires time, patience and a lot of experience. However, new cryptocurrency investors do not have the time to invest with proper research, due to the lack of experience with this new volatile industry. So, the best solution is to invest with us and we will strategically do the work for you to the best of our ability. The fund is constantly managed and new coins are researched to provide the best return on investment.

PROBLEM STATEMENT

As the Blockchain industry expands, more and more investors around the World are getting interested in crypto asset. Also, they are becoming aware of the advantages of converting some of their savings into crypto assets. These new technologies open vast perspectives to revolutionize financial systems, payments, savings etc.

However, potential crypto investors face 2 main problems:

Problem 1: High volatility

The crypto market is very volatile. Because it's still a small market and there is a high correlation between the price of the major cryptocurrencies (BTC, ETH, DASH...), therefore, even the smallest movement can have a huge effect on the price, specially taking into account that wealth distribution in cryptocurrencies is very disproportionate. Investors have very few means to protect the value of their portfolio while staying in the crypto space.

Problem 2: Value not backed by anything

Today, very few cryptocurrencies are backed, liquid and stable. A token that is pegged will have a lower volatility and can even be used as a "safe haven" for value when the market faces a volatility crisis.

Sounds good, but very few cryptocurrencies offer this right now.

CRYPTOLICO AS A SOLUTION

The problems highlighted in the previous section are few of the problems faced by investors in the crypto space. These problems are well tackled by CryptoLico. For the very first problem which is the problem of high volatility, CryptoLico hold investors funds in a Stable USDCoin which is pegged at a 1:1 value with the USD because it is backed by US Dollars which are held in reserve by regulated financial institutions (Silvergate bank and USBank "USBAM"). This ensures liquidity and stability of all investments.

We also only trade investors funds in the market for only 3hours in every 24hours in-order to take advantage of the volatility in making high returns as our AI systems keeps learning and improving trading trend.

About CryptoLico

CryptoLico is very pleased to introduce you to the firm behind our success story, Crypto Currency Trade Limited (CryptoLico). A company authorized and regulated by the Financial Services Authority ('FSA').

We are a group of committed and diverse team with track records as tech entrepreneurs, professional traders, investors, artificial intelligence specialists, corporate leaders and Change-makers in Europe, Americas, Asia and Africa.

CryptoLico was founded on the conviction that open crypto technologies would replace the world's closed, proprietary financial systems, allowing everyone, everywhere to participate in an economy that's fairer, more inclusive and more accessible.

At present, our platform drives a new kind of global financial service and digital investment company; one where we help individuals, institutions and entrepreneurs create and securely grow their wealth by deploying profound and innovative strategies that has constantly proven its capacity to generate lots of profit. Our platform is very intuitive, secure and easy-to-use.

Whether you're building financial freedom, generating wealth for clients, developing decentralized apps or growing your own company, CryptoLico is your best bet.

Why we Chose USDCoin?

BACKED BY US DOLLARS

USDC is a stablecoin backed by US dollars, which are held in reserve by regulated financial institutions.

The tokens themselves are also issued by regulated financial institutions, and every token can be redeemed for one dollar — effectively providing a price stable cryptocurrency.

POWERED BY BLOCKCHAIN

Because it's an ERC-20 token that runs on the Ethereum network instead of traditional bank rails, USDC lets you move dollars anywhere in the world in minutes instead of days for very little cost. Use it with any participating wallet, exchange or service.

FULLY TRANSPARENT

Every month, the US dollar reserves for USDC are attested to by top accounting services firm (Grant Thornton LLP) The reports are published on <https://www.centre.io/usdc-transparency> so that you can be confident that USDC is always 100% redeemable for dollars — this is true financial and operational transparency.

Getting Started with CryptoLico

Becoming an investor in CryptoLico is very simple. To become an investor, you must create and verify your portfolio on our official website www.cryptolico.com. You will be able to deposit, invest, and withdraw from your personal portfolio at any given time.

What is your CryptoLico Portfolio

The CryptoLico portfolio is an essential factor in the fund that separates CryptoLico from traditional funds. As it is built on the Ethereum network which is much more secured, it is secured with 12 random seed keys that are used to link the device with the account and requires a password consisting of 16 characters. This is to ensure maximum security. Adding to that, the portfolio is also used to track all investment gains, deposits, withdrawals, and referrals. Since CryptoLico aims for maximum transparency it is essential to provide all the tools to track your finances within the platform.

Adding Funds to Your CryptoLico Portfolio

Although all investors are provided with their personal CryptoLico Portfolio where they have absolute control of their funds, we believe in transparency and thus we have set no minimum investment period, which means you can choose to exit the investment at any given time. We allow this because CryptoLico believes in operating closely with investors giving them full access to their funds without any restrictions. After you create your portfolio you will need to transfer funds via either bank wire or BTC transfer.

Both deposit choices have similar process

Deposit by Wire:

Log in to your CryptoLico portfolio and click deposit, input the amount you wish to deposit, choose "WIRE TRANSFER" and submit request. We will send you an email with CryptoLico Banking details, once you receive the banking details, make transfer of the appropriate amount you have requested to deposit no later than 24 hours after you receive the banking instruction and send us the payment slip at clientrelations@cryptolico.com. Once we confirm payment, your portfolio would be funded immediately, and you will receive an email confirming your portfolio has been funded. Now that these funds are visible, navigate to the right side of the portfolio page and click the "Add Investment" tab, input amount and confirm investment. Your investment will be booked, and you'll begin to see what your money makes every day.

Deposit by Bitcoin (BTC):

Log in to your CryptoLico portfolio and click deposit, input the amount you wish to deposit, choose "BTC" and submit request. You will immediately see CryptoLico BTC Address, make transfer of the equivalent amount in BTC you have requested to deposit no later than 3 hours submitting request and send us the payment slip at clientrelations@cryptolico.com. Once we confirm payment, your portfolio would be funded immediately, and you will receive an email confirming your portfolio has been funded. Now that these funds are visible, navigate to the right side of the portfolio page and click the "Add Investment" tab, input amount and confirm investment. Your investment will be booked and you'll begin to see what your money makes every day.

Minimum Investment Period

When it comes to CryptoLico, transparency is our watchword that is why we have set no minimum investment period. This implies that an investor can choose to exit the investment at any given time.

We allow this because CryptoLico believes in operating closely with investors giving them full access to their funds without any restrictions.

Minimum Investment Amount

With CryptoLico, the minimum investment Amount is 10,000 USD. For every investment made, there is an ROI of 3.6% + monthly. Means you can ADD Multiple investment in your portfolio

Fund Fees

CryptoLico does not charge any fees. No hidden fees, no withdrawal fees or deposit fees.

Investment Contract Termination

If you choose to exit the investment, we will deposit your balance (your profit and initial capital) into your CryptoLico Portfolio. It will take around 24 hours for the fund to liquidate your funds and send your money to your bank account or BTC address. By doing so, you will no longer see any investment growth on your digital asset. In order to do a withdrawal, you must go onto the CryptoLico portfolio page and click the withdraw button and make a withdrawal request. Once requested, you will receive an email requesting your banking details or BTC address, once we receive the address, we will send your funds to you immediately.

Risk and Disclaimer
